

# PROJECT OVERVIEW

## **Project description :**

Meticulous household cleaning service is a website designed for the customers for the booking of online cleaning services. It provides the booking of janitors for indoor and outdoor cleaning services, handyman for household repair and gardener for garden maintenance. Customers can book for the required services through mobile numbers or by submitting the enquiry or by composing a mail which is provided in the website.

## **Site purpose :**

- To attract the customers by providing excellent online booking services.
- To break geographic barriers that slows down the services of online booking.
- To provide important details such as contact information and queries to the customers.

## **Coding used :**

- HTML
- CSS
- Java Script
